ICOD is a human organisation that is established on a strong foundation of inter-religious harmony, tolerance, peace and love under the guidance of great socio-spiritual advisor Brother Gaston Dayanand.

Our “5 Rights“ program are the building blocks over the inter-religious foundation to transform lives of destitute who could be either mentally or physically challenged men/women, or aged or orphan/semi-orphan children.

ICOD has taken various projects under each of these Rights programs with supports from volunteers, donors, well-wishers. These projects are at different levels of maturity and are required extensive support from individuals, organisations, governments to reach the desired levels
